

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently amended) A media cartridge, comprising:

a case in which a roll of blank media may be deployed;

the case having two halves, hinged together, an area between the two halves, when closed, defining a media supply slot; and

the case having internally and adjacent to the slot, a pair of rollers, at least one of the rollers being a driven roller which is supported at each end, by the case, for rotation by an external motor;

the cartridge further comprising at least one clip adapted to engage a support for said roll of media and said pair of rollers to retain said support and said pair of rollers in an operative association with respect to each other.

2. (original) A media cartridge as claimed in claim 1, wherein:

the two rollers are held in proximity by a resilient bias, one roller on either side of the slot.

3. (Original) A media cartridge as claimed in claim 1, wherein:

the driven roller has at one end, a fixture for coupling to a driving shaft, the case having an opening which allows access to the fixture.

4. (Currently amended) A media cartridge as claimed in claim 2, wherein:

the rollers are held in proximity by a pair of said clips;

each roller having a circumferential slot at each end;

each clip having two extensions which engage the slots of both rollers at one end.

5. (Original) A media cartridge as claimed in claim 4, wherein:

the two extensions of a clip are joined to a clip body, the body having a central opening for receiving and locating a core which fits in the case.

6. (Original) A media cartridge as claimed in claim 5, wherein:

the clip body has an anti-rotation feature which is adapted to engage with a cooperating feature of a core, to prevent the core from rotating in the case.

7. (Original) A media cartridge as claimed in claim 6, further comprising:

a core, adapted to cooperate with the clip body by engaging with the anti-rotation feature.

8. (Original) A media cartridge as claimed in claim 7, wherein:

the case has at one or both ends, slots for receiving and retaining a clip body.

9. (Original) A media cartridge as claimed in claim 1, further comprising:

an integral handle at one end of the case.

10. (Original) A media cartridge as claimed in claim 1, further comprising:

a folding handle located on a top surface of the case.

11. (Original) A media cartridge as claimed in claim 1, further comprising:

an integral handle at one end of the case and a folding handle located on a top surface of the case.

12. (Original) A media cartridge as claimed in claim 1, wherein:

the case is a molded polymeric case with an integral hinge, held in a closed position by one or more clips.

13. (Original) A media cartridge as claimed in claim 1, wherein:

the driven roller is longer than the other roller, the other roller being an idler roller which is contained within the case when it is closed.

14. (Original) A media cartridge as claimed in claim 4, wherein:

the clips are reversible and adapted to be used at either end of the case.

15. (Original) A media cartridge as claimed in claim 1, wherein:

the two case halves are formed as a single molding with an integral hinge, the molding having formed in it internal slots for receiving a pair of clips which are used to hold the rollers in proximity.

16. (Original) A media cartridge as claimed in claim 1, wherein:

one case half has formed in it a journal at each end for supporting one of the rollers.

17. (Original) A media cartridge as claimed in claim 1, wherein:

one case half has formed in it a journal at each end for supporting the driven roller.

18. (Original) A media cartridge as claimed in claim 1, further comprising:

a core which is located in the case, the core having around it, a supply of blank wallpaper media.

Claims 19 - 47 (cancelled)
